

## Command usage rules

Following commands are set up:

/sent

/received

/help -> get a short explanation what you can do

Syntax for **sent** and **received**:

**/sent >Value< >Currency< on/in >PaymentMethod< Note: >Your Note< (optional, if Currency is EUR) Value: >Value in USD<**

For the Value numbers in european aswell as american format are excepted – Example input:

1.395

1,536

23,99

633.99

3.526,50

8,362.32

Wrong numbers, can't be process or will lead to wrong calculations – **Not working** Examples:

13.9353.52

15,32,363

For Currencies you got two options, either EUR or USD. Only use EUR and USD. Between each separat String leave a black space. If there's no Currency given, USD is choosen by default. Watch out these are case sensitive – **working** Examples:

1.395 EUR

1.536 USD

**Not working** Examples:

1.383 Euro

1,362 US-Dollar

1,643 eur

Do not combine two strings – **Not working** Example:

1,362EUR

**Value** aswell as **Note** are optional, they don't have to be added. If they are added only add "Note:"/"Value:", with your note following, to the command. Value is only necessary if the your amount is in EUR and it has been processed in the past. Live transactions are been calculated by real time exchange rates. – **working** Examples:

Command + Note: This is my Note

Command + Note: Here goes the Note Value: 1300

Command + Value: 1503
